DMS Controls Group, LLC Website: <http://dmscontrolsgroup.com/>

At DMS Controls Group, we provide you with the specific visibility into your building where you need solutions first. At DMS Controls Group we work with you to make your assets and buildings more energy efficient, sustainable, and safer environments. We optimize the smart solutions for your specific integration, remote monitoring, and control needs.

It's about taking proven steps that produce immediate results. We provide the tools – the hardware, software, and the qualified integration support that you need to leverage your existing assets with future-ready solutions that stop the energy pain and inefficiencies first, providing for the next best step.

We help building owners, facility operators, and facility managers at many levels with varying degrees of support to make their buildings more energy efficient and safer environments. We help decision-makers with the latest industry knowledge and the products that make the biggest impacts, quicker.

Integration and Control of Building Functions and Enterprise Solutions for Building Management, HVAC, Energy, Security, and Lighting Applications

Integrated Security and Building Convergence Applications: Access Control, Video, Intrusion, and Threat-Level Management
Good, Better, Best Range of Smart Solutions for Remote Monitoring and Control.

With over 60 years of industry experience in the wholesaling and buildings controls distribution markets of Western Pennsylvania and West Virginia, we look forward to assisting you with your Honeywell WEBs-AX, Tridium Vykon, Thermokon, ACI, and host of other control manufacturers products and services.
